NOTE FROM RSIC CONCERNING STATUS OF NJOY

Enrico,

When RSIC received NJOY94, there was first a problem with HEATR. After HEATR was repaired sometime during Feb95, Jennie was busy working on another project.

We are happy to report that Jennie has just completed the packaging of NJOY94 after several iterations with MacFarlane. The final version will be NJOY94.5 which will be made available to you. For your information, the date for up5 is May 31, 1995.

I noticed that you have a standing request for NJOY94 which should be mailed before the end of June. I do not think the documentation for LEAPR is inhouse. However, an online version is available from LANL via ftp. Let us know if the post-script file will satisfy your needs. I believe Jennie has requested a hardcopy of LEAPR from LANL. Documentation for VIEWR is more informal.

Ciao,

John
