Closing Session
• What is a notable achievement or progress in each research area?
• What is a notable achievement or progress in each research area?

• What is to be done for further development?
• What is a notable achievement or progress in each research area?

• What is to be done for further development?

• What is a technical obstacle, if any, for further development?
• What is a notable achievement or progress in each research area?

• What is to be done for further development?

• What is a technical obstacle, if any, for further development?

• What is recommended for the development of P&T technology?
• What is a notable achievement or progress in each research area?

• What is to be done for further development?

• What is a technical obstacle, if any, for further development?

• What is recommended for the development of P&T technology?
• Transition scenarios
• Impact of P&T
• Partitioning
• Fuels and targets
• Materials
• Physics experiments and nuclear data
• Transmutation systems
