## Overview

In this benchmark a lattice of $5 \times 5 \times 1$ separated highly enriched uranium metal spheres is considered. The separating material being the air. The center-to-center distance between spheres is 80 cm . All the spheres have the same composition (see Table 1). The radius of the central sphere is 10 cm while the radius of the other spheres is 8.71 cm . Figure 1 describes the overall geometry. The benchmark is an adaptation from Kadotani et al. (Proc. ICNC'91, Oxford, 1991)

## Specifications

## Material data

The fuel and air compositions are given in the following Table (in atoms/barn.cm):

| High enriched uranium metal |  |
| :---: | :---: |
| U235 | $4.549 \mathrm{E}-02$ |
| U 238 | $2.560 \mathrm{E}-03$ |
| Air |  |
| N | $4.3250 \mathrm{E}-5$ |
| O | $1.0810 \mathrm{E}-5$ |

Table 1

## Geometry data

The following figure describes the problem geometry. The spheres are numbered as in a conventional matrix, so that the lowest left-hand sphere in the figure below is in position $(1,1)$ and the top right-hand sphere is in position $(5,5)$.

## $\underline{5 \times 5 \times 1 \text { spheres }}$

## Required calculations

Calculations are to be performed using the following parameters:

- $\mathbf{1 2 5}$ neutrons per generation
- $\mathbf{1 0 0 0}$ active generations.

The source distribution of the $\mathbf{1 2 5}$ starting neutrons is the following:

- 101 neutrons in the centre of the sphere $(1,1)$,
- 1 neutron in the centre of each of the other 24 spheres.

Three different numbers of skipped generations (preceding the 1000 active generations) should be employed: 0, 200 and $\mathbf{4 0 0}$.

For each number of skipped generations, $\mathbf{1 0 0}$ replicas will be run, using different random numbers sequences.

300 calculations are therefore required as follows:

| Case | Random numbers <br> sequence | Skipped <br> Generations |
| :--- | :---: | :--- |
| 1 | $\# 1$ | 0 |
| 2 | $\# 1$ | 200 |
| 3 | $\# 1$ | 400 |
| 4 | $\# 2$ | 0 |
| 5 | $\# 2$ | 200 |
| 6 | $\# 2$ | 400 |
| $\ldots$ | $\ldots$ | $\ldots$ |
| 298 | $\# 100$ | 0 |
| 299 | $\# 100$ | 200 |
| 300 | $\# 100$ | 400 |
