

Restrictions on the use of the IFPE database

Authors and their establishments must be consulted if an organisation receiving data and their documentation intends to use them to provide commercial service to outside users.

Data and their documentation are provided on the understanding that the agreement of the originating establishment shall be obtained before a service is offered involving sale or use on a fee-paying basis of any data set distributed by the NEA Data Bank. This restriction applies also to modified versions derived from copies obtained from the NEA Data Bank.

Transfer of data and their documentation to a user in a given establishment confers only the right to use them within that organisation: in particular, copies of data and their documentation should not be distributed to persons outside their own establishment; users in other centres should contact the NEA Data Bank directly in order to obtain copies.

Data and their documentation are provided on the understanding that whenever the use of these obtained through the NEA Data Bank, or locally modified versions of them, results in a publication (a journal, conference proceedings, laboratory report, book etc.), the data and their author or laboratory of origin shall be acknowledged in the publication.

Please note that the data dispatched are preliminary and are being sent on condition that you will review the material and report to us problems you may encounter. Your information will be used to improve the content of the database.

To be more specific as to how these restrictions must be interpreted the following should be noted:

- The data and their documentation users receive from the Data Bank cannot be further distributed, thereby prohibiting the sale of such material.
- Users are not permitted to make the data available online allowing other users to access them.
- However, there is no objection to expert users within a contract or project with a third party, modelling a problem, interpreting results and recovering the cost of their work and expertise by using the material received from the Data Bank.
- In order to hold training courses/classes and workshops with hands-on use of data distributed by the NEA Data Bank, the Data Bank must be consulted and specific authorisation must be obtained if the authors or managers of the code concerned are not directly involved in the course/class/workshop.

Disclaimer

Neither the Organisation for Economic Co-operation and Development (OECD) or any of its member countries, nor any person acting either on behalf of any of them or otherwise in furtherance of the activities of the Nuclear Energy Agency (NEA) assumes any liabilities with respect to the use of, or for damage resulting from the use of, any information, method or process disclosed in the distributed material.

This also applies to non-member countries and Organisations that have contributed to the distributed information.

Feedback

Recipients of data and their documentation are invited to report back to the NEA Data Bank with the following information concerning material received:

- errors or shortcomings detected
- inconsistencies with the documentation
- limitations found in its applicability not reported in the documentation
- improvements carried out (corrections of errors or removal of shortcomings)
- information on validations carried out.

This activity aims towards updating and maintaining the quality of the IFPE database.

I agree to these conditions.
