

## Comments by SG12 Monitor

*Pavel Obložinský, IAEA Vienna*

1. **Monitor compliments** new coordinator of SG12 for effective approach and promising results achieved in a short time
2. **Monitor reminds** the original mission of SG12 as defined by WPEC in 1993 (Aix-Provence, 16-17 June):

### Subgroup 12: Nuclear Model Validation

The subgroup should cooperate closely with the IAEA coordinated development of a data base of nuclear model parameters. It should also coordinate the collection of nuclear models, indicating the range of applicability of each and produce a well-tested transportable system of computer programs to be used by the nuclear data evaluation community. All these activities should be well documented.

3. **Monitor recommends** that WPEC reconsiders SG12 mission in the light of coordinator's intentions (focus on models for nucleon energies 20-150 MeV, compile experience, produce document)
