

Conditions for Release, Rules and Restrictions Applying to the TVA Watts Bar Unit 1 Multi-Physics Multi-Cycle Benchmark

The data and other experimental information are released under the following conditions:

- The data and information is exclusively released to participants in the TVA Watts Bar Unit 1 Multi-Physics Multi-Cycle Benchmark Study.
- Recipients of the data will use it exclusively for model and code improvements for coupled neutronics, thermal-hydraulics and/or fuel performance simulations including uncertainty analyses in modelling.
- Recipients agree not to make copies of the information and not to further distribute or sell it to third parties.
- Recipients agree to provide feedback on deficiencies or errors they may find in the data.
- Recipients agree to inform the benchmark organisers before publishing any study results for which the TVA Watts Bar Unit 1 Multi-Physics Multi-Cycle Benchmark data have been used.
- Data and its documentation are provided on the understanding that whenever the use of the data obtained through the NEA, or locally modified versions of them, results in a publication (a journal, conference proceedings, laboratory report, book etc.), the data and their author or laboratory of origin shall be acknowledged in the publication.
- Recipients agree to provide NEA with output results from their analyses as specified in the benchmark.

DISCLAIMER

Neither the Organisation for Economic Co-operation and Development nor any person acting on behalf of the organisation assume any liability with respect to the use of, or for damage resulting from the use of the data and information released.

I agree to these conditions
